R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
##  1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##  Mean   :15.4    Mean   : 42.98
##  3rd Qu.:19.0    3rd Qu.: 56.00
##  Max.   :25.0    Max.   :120.00
```

```
x1 <- rnorm(200)
x2 <- x1 + rnorm(200)
y <- 1 + x1 + rnorm(200)
summary(lm(y ~ x2))
```

```
##
## Call:
## lm(formula = y ~ x2)
##
## Residuals:

## Multiple R-squared:  0.2395, Adjusted R-squared:  0.2357
## F-statistic: 62.37 on 1 and 198 DF, p-value: 1.92e-13
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

Inline R: `x <- 1`

```
data(cars)
knitr::kable(x = head(cars), caption = "A knitr kable table")
```

Table 1: A knitr kable table
